

Pump lobe suitable for concentrated materials

Applications

Suitable for food, cosmetic, pharmaceutical and chemical industries

- For transfer of concentrated materials without damaging the fabric of the product (without applying stress to the product)
- Input and output parts: 2.5 inches
- Parts in contact with 316 L steel
- Maximum output pressure 6 or 8 atmospheres (depending on gearbox motor power)
- The electric motor, gearbox and pump are all mounted on a chassis made of 304 steel.
